March Winds—

Why am I glad when March winds
blow?
Can't you guess? Don't you know?
Why, March winds toss my kite so
high
(It seems like an eagle in the sky.)

And March winds drive the white
clouds so
They look like sheep or drifts of
snow,
They turn the windmills and play
such jokes
As blowing off hats from common
folks.

Why am I glad when March winds
blow?
For all of these reasons. Besides, I
know

That the winds of March are the
winds of spring,
And when we'll have flowers and
birds that sing.

"Speaking as a Chinese, I do not
think that any civilization can be called
complete until it has progressed to
some application to unphilosophical
and made a conscious return to
simplicity of thinking and living, and
call to men who until he has made
progress from the wisdom of foolishness,
and become a laughing philosopher,
feeling first life's tragedy, and then
life's comedy. Out of sadness comes
the awakening, and out of the
awakening comes the laughter of the
philosopher— with kindness and
tolerance included."

"To me, wisdom and courage are
the same thing, for courage is born of
an understanding of life; he who com-
pletely understands life is always
brave."

Extracts from "The Importance of
Living," by Lin Yutang.

LETHBRIDGE EXPERIMENTAL STATION WEEKLY LETTER

Enquiries are frequently received
at the Lethbridge Experimental Station
as to the possibilities of growing
soybeans in Alberta.

In answering such enquiries, at-
tention must be drawn to the fact
that in eastern Canada and in the United
States, where soybeans can be
grown very successfully, climatic con-
ditions are very different from those

prevailing in Alberta. Soybeans re-
quire much the same sort of growing
season as corn. Many different
varieties have been tested at the Leth-
bridge Experimental Station during
the past eight or ten years and only
two varieties, namely, Wisconsin
Early Black and Manitoba Brown,
have been found sufficiently early to
ripen each season. Soybeans cannot
compete with alfalfa as a hay crop on
irrigated land, and on dry land, oats
or some other cereal crop cut as
greenfeed would probably give a
greater yield of hay. When they are
allowed to ripen and are fed in the
ground, acting as master of common
for any kind of live stock except fattening
hogs. The objection in this case
being their tendency to produce soft
pork.

The two varieties mentioned above
may be grown in southern Alberta
with fair success but yields such as
those obtained in warmer climates
should not be expected here.

HERVEY NOTES

A goodly number of the neighbors
gathered at the May home Monday,
March 21, at a farewell party. Mr.
Supreme acting as master of ceremonies
presented Mr. and Mrs. May with
tokens of remembrance. Needless to
say we will miss them greatly but all
join in wishing them every happiness
in their new home at Chestermere.

A number of the young people of
Hervey welcomed Miss Peter to her
home in Calgary last Sunday.

Mr. Peter Hazant is able to be out
of doors again.

Some improvements are being made
to water supply at the schoolhouse.

NIGHTINGALE

Several neighbors and friends gathered
at the Walker home for a sur-
prise party to Mrs. A. Walker to
celebrate her birthday, on Monday
last.

Mr. and Mrs. Payne had as dinner
guests last week Mr. and Mrs. C. Mor-
gan and family.

About 72 persons gathered at the
school house to join in the St. Pat-
rick's party that Miss Taylor's pupils
had arranged. About an hour and a
half programme was thoroughly en-
joyed by all after which games were
played by all present. A delicious
lunch was served at midnight by se-
ven young ladies, all wearing St. Pat-
rick's aprons and plenty of green.

Mrs. Dougan spent a very enjoyable
week in Calgary visiting with her
daughters.

Mr. and Mrs. Geo. Thurston, Sr. were
visitors to Calgary recently.

Mr. and Mrs. Trollope enjoyed a few
days in Calgary last week.

Florence Hamer of Edinville is
visiting here at present with her sister
Mrs. Jack Stodoley.

Don Douglas was joy riding on Sun-
day but the joy didn't last long. In
the middle of the afternoon he
brought his limping lazy into Hilton's
garage with a broken piston. Better
luck next time Don.

A community supper was held in
the hall on Friday. From 90 to 100
people thoroughly enjoyed their sup-
per, which was plentiful. Later there
was community singing also, solos,
duets and tap dancing. The Terrific
Four, again caused a riot, when they
appeared in costume and sang two
songs. Mrs. Thurston, Don Murray
and Walter Mercer kindly played for

STANDARD

Above and beyond the standardized
processing of ALBERTA
BEER by skilled Brewmasters, is
the standard equipment in use at
all Alberta Brewing Institutions.
True, they use the old formulas
and the choicest of ingredients, but
the methods of control are infinite-
ly finer. Modern equipment, im-
proved plant construction, and
handling facilities contribute
greatly to the high STANDARD
maintained in the manufacturing
of ALBERTA BEERS.

THE WEEKLY NEWSPAPER

Ours is a changing world. New inventions outdate many things to which we become accustomed, but nothing yet has been devised to take the place of the country weekly newspaper. It is so interwoven with the community life in the rural districts, so much a part of the warp and woof of humanity that it cannot be supplanted—Hanna Herald.

NEWSPAPERMEN SET FINE PRECEDENT

Something ne happened in Ottawa last week. A delegation of 20 waited on Prime Minister King and three senior cabinet ministers without asking for any handout, tax or legislative favor. The delegation comprised a group of working newspapermen—directors of the Canadian Newspaper Association.

Such unusual tactics took the cabinet members by surprise; they waited for the "joker." When none was forthcoming the Prime Minister shot his usual reticence; talked frankly and freely about current national problems. In return the editors urged the government to find ways and means of providing local papers with more regular, informative material about the affairs of state, the work of government departments; the doings of lawmakers.

HITLER DURING THE PAST FIVE YEARS—WHAT OF THE FUTURE?

Five years after the day in 1933 when Hitler strode from Munich to promise the German people a return to world power, his troops entered Austria as conquerors, and the end may not be yet. Hitler pledged himself to throw off the shackles of the Versailles Treaty and to give bread and work to the German people.

Work he has given, largely through increased armament construction. Unemployment reduced from 6,000,000 to 1,500,000. Food one lb more per person per year—but still the populace is on ration.

Hitler has preached the glory of the German race to serve as an opiate for the rigid rule established. To attain world power 65,000,000 Germans have surrendered free elections, freedom of speech and of press and the taxes on the Germans income have increased from 14 per cent to 25 per cent.

What is the trend?

DO YOU REALIZE THE VALUE OF GOOD IRRIGATED PASTURES?

—1937—

Lethbridge Experimental Station

At the Lethbridge Experimental Station an acre of permanent irrigated pasture yielded feed equal to four tons of alfalfa, 108 bushels of barley or 81 bushels of wheat in a single year. This was the average for 1936.

DO YOU KNOW—that lifting shovels will adapt your self-timed Field Cultivator for emergency drilling control?

Remove all shovels and equip the machine with lifting shovels on the rear row of shanks only at approximately 3-foot intervals. Badly drifting fields listed with this machine deeply enough to bring up clods of earth have been held successfully. If clods wear down and the soil again drifts it will be caught in the furrows and held at home. If the furrows fill up level the field can be relisted. Members of Agricultural Improvement Associations throughout southern Alberta have saved several thousands of acres in 1937 by this method and the practice is growing in favour due to its efficiency and economy.

OFFER NO. 1
One magazine from group 1 and this newspaper.

OFFER NO. 2
Three magazines from group 1 and this newspaper.

WILL PLOUGHLESS FALLOWING CONTROL WILD OATS.

—1937—

Lethbridge Experimental Station

Sometimes in attempting to solve one farm problem the answer to another is accidentally discovered. An example of this is found in the help provided by ploughless fallowing in controlling wild oats. Ploughless fallowing has been widely developed to preserve trash covers for preventing soil drifting and it has been observed that wild oats are disappearing or have completely vanished from fields that have not been ploughed for several years.

This is accomplished, undoubtedly, by keeping the oats near the surface where it will germinate instead of turning it under with a plough to dormant until the next ploughing brings it near the surface where it can germinate and again infest the field.

CARSELAND

Silver Wedding Anniversary of Mr. and Mrs. William Laurie.

A delightful reception was held at the home of Mr. and Mrs. W. Laurie on Thursday, March 24th celebrating the 25th anniversary of their wedding.

In the living room, amid gay spring flowers, Mr. and Mrs. Laurie received the guests, numbering about 160, among those being Mr. and Mrs. Coyle of Calgary, Mr. Coyle having been the best man at the wedding of Christine Thompson and William Laurie, in St. Paul's Anglican church Ottawa in 1913.

A very fine Westminster Clock, and a case of silver, in the Cornucopia Room were presented to the happy couple by Mr. O. Moorhouse, on behalf of their many friends, wishing them many more years of wedded happiness. Mr. and Mrs. Laurie came to Carseland in the Spring of 1913, residing here, and taking an active part in community life ever since.

GRASSHOPPER THREAT IN 1938

—1937—

The grasshopper conditions for 1938 in Alberta continue to be extremely serious, the federal department states, and will require that the province continue its widespread and well organized control campaign. To avoid ruinous losses of crop in very large districts. The most striking feature of the situation are the increase in the very severely infested districts between Lethbridge and Calgary, the eastward spread of infested territory in the south, and the northward extension of the infested area. Fortunately a great proportion of the increase of the territory involved is but lightly infested and will not require organized control, so as when grasshoppers were noticeably abundant in 1937 farmers should be on the alert in the early season. The Budget.

THE WORLD OF WHEAT

—1937—

By H. L. G. Strange

Spring now has come, and the farmers' thoughts turn to the fields which are to provide the family living. Implements will be repaired and cleaned, the seeder receiving particular attention. Wise farmers are this have made their arrangements for good seed, and are now considering the problem of treating against smut. Seed treatment is as old as history. Virgil in his immortal poem on farming "The Georgics," written about 25 B. C., tells us—
"Oft have I seen a sower dress his seed
With soda and black lees of olive oil."

but the modern farmer has the choice of several better methods.

The old standby, Formaldehyde, is the cheapest, but must be made up of exactly the correct strength, else the germination of the seed may be damaged.

The new mercurial dyes—Ceresan and Leytosan—are becoming increasingly popular. While more expensive, they have several advantages over Formaldehyde. In the first place the dyes control not only sticking smut, but also in a great extent root rot bacteria, thus promoting a more generous and healthier rooting system, which in turn helps to keep down weeds; all tending, therefore, to bring about higher yields.

Secondly, when Leytosan or Ceresan is used, seed can be treated several weeks before sowing, thus making the farmer's work easier and less hurried.

THE WORLD'S GOOD NEWS
will come to your home every day through
THE CHRISTIAN SCIENCE MONITOR
An International Daily Newspaper
It teaches the way to the highest good, and is the only paper that is free of all religious, political, and party bias. It is the only paper that is not owned by any one man, but by the people of the world. It is the only paper that is not sold for profit, but for the good of the world. It is the only paper that is not controlled by any one man, but by the people of the world. It is the only paper that is not sold for profit, but for the good of the world. It is the only paper that is not controlled by any one man, but by the people of the world.

There is no catch in this.

If the Premier of your Province said to you, "I will pass the one piece of legislation which in your opinion will do the most good." What would you ask for?

For the best answer to this question, along with \$1.00 subscription to this paper, either new or renewal, we will give a

Beautiful Flower Garden FREE 500—Gladiolus Bulbs—500

All No. 1 in size from 1 1/4 to 8 1/2 inches in diameter, 50 different varieties, including such high class ones as Aida, Bagdad, Comrade, Commander, Kobi, Copper Bronze, Dr. Beaudet, Flaming Sward, Gold Eagle, Giant Nymph, Himmelon, Jewel, King George, Marmora, Mexico, Our Selection, Pelegrina, Prince's Triumph, The President, Flamingo, etc. All colors—red, white, blue, pink, purple, smoky and bronze, and every shade in between. Glads are the very best flower for the prairie. No other excels them in beauty. Plant early in May, four inches deep, plant like onion sets and just as easy to grow.

These bulbs are sure flowering, all hardy, acclimatized kinds grown under ordinary field conditions, in the largest acreage of Glads on the Prairies, by COLIN H. BURNELL, WILLOWBROOK FARM, OAKVILLE, MANITOBA.

This collection of bulbs, if bought at ordinary retail prices, would cost from \$25.00 to \$40.00. You can obtain this garden full of superb Gladiolus Bulbs by sending in the best answer to the above question.

No answer should contain more than 100 words, and all answers must be in before April 15th. Editor and one other will be the sole judges as to the best answer received, which will be published along with the name of the winner.

PEACE GROUPS FOUND
 TURNING TO JOINT ACTION

Economic Cooperation to Remove
 Dangers of War is Urged.
 Washington—Representatives of
 42 American peace organizations as-
 sembled here for the Conference on
 World Economic Cooperation went
 on record today in unanimous favor of
 a sweeping program of world econ-
 omic action designed to remove the fun-
 damental cause of political tension and
 the danger of war.

Giving Council Hill, Secretary of
 State, strong support for his trade
 treaty policies, the group went on to
 recommend early settlement of the
 war debt issue by executive initiative
 of President Roosevelt, expansion of
 the international monetary stabiliza-
 tion agreement in which the
 United States is now participating ac-
 tively, and early negotiations towards
 achieving the world "pact of economic
 collaboration" which was set as the
 ultimate objective of economic ap-
 pearment in the recent report by
 Paul van Zeeland, former Prime Min-
 ister of Belgium, to the British and
 French Governments.

—Christian Science Monitor.

CHRISTIAN SCIENCE

At all Christian Science Churches
 next Sunday, the subject of the Les-
 son-lesson will be "Unreality." One
 of the scriptural quotations in the
 Lesson-Sermon is, "I said, I had
 found a place where I could dwell,
 "Fearfulness and trembling are com-
 mon to me, and horror hath over-
 taken me, and I said, Oh that I had
 wings like a dove! for then would
 I fly away, and be at rest." One of
 the correlative passages from "Sci-
 ence-Religion" is, "Key to the
 Scriptures" by Mary Baker Eddy, 16.
 "Who that has felt the loss of human
 peace has not gained stronger desires
 for spiritual joy?" The loss of earth-
 ly hopes and pleasures brightens the
 ascending path of many a heart."
 (p. 265).

A newspaper reports that Sir Her-
 bert Hux has just been elected a Di-
 rector of the Consolidated Gas and
 Electric Light and Power Company of
 Baltimore. With half a hundred such
 appointments already to his credit
 one wonders what thrill, if any, the
 noble knight will get out of this one;
 and does the company hope to bene-
 fit by his advice of its new Director
 or by the financial potency of his
 name?

An American manufacturer of toy
 trains, reports a profit of \$350,000 on
 the year's operations. During the same
 period the Baltimore Locomotive Works
 lost money. The nursery may yet pro-
 vide the answer to some of railroads'
 problems.

India's second estimate of area sown
 to wheat for the 1938 harvest placed
 it at 32,000,000 acres. —The Budget.

SWEET PEAS EARLY

Sweet Peas must be planted early.
 This plant develops its extensive root
 growth and upper vine structure
 when the weather is cool. If it does
 not get its feet well down into the soil
 then, when the days turn hot, it is li-
 ble to wither and cease furnishing its
 daily quota of color and fragrance.
 Planting directions are simple but
 important. Successful gardeners advise
 a trench, dug at least a foot deep, fil-
 led with straw or hay, and fragrant
 rich soil, mixed with well rotted man-
 ure or old leaves. Seed is planted
 just as early in the spring as possible
 about an inch or two deep. Rains will
